Objective

Motivated third-year Information Technology student at New Cairo Technological University with strong interest in software development, web technologies, and full stack applications. Experienced in Frontend Development using React.js and Angular, with practical knowledge in HTML, CSS, JavaScript, and UI/UX design principles. Hands-on experience as a PHP Developer and currently building backend skills using .NET and ASP.NET Core, including RESTful APIs and database integration. Seeking a Junior Frontend, PHP Developer, or Backend ASP.NET role to contribute to scalable, secure, and high-performance web applications.

Experience

Frontend Developer Intern

July 2024 – August 2024

Prospera Systems

Egypt

- Collaborated with a team of 4+ developers and designers on production-level web applications.
- Enhanced responsive frontend components using HTML, CSS, JavaScript, and modern frontend development practices.
- Assisted in debugging and optimizing frontend features, reducing UI-related issues during testing.
- Applied Git-based workflows and Agile development practices in a professional environment.

UI/UX Instructor

6 Months

Google Developer Groups (GDG) – University Chapter

- Delivered 10+ hands-on UI/UX workshops covering design fundamentals, user research, and wireframing.
- Mentored 30+ students on practical UI/UX projects using Figma.
- Guided participants through complete design thinking workflows from ideation to prototyping.
- Improved participants' understanding of usability, accessibility, and user-centered design.

Data Science & AI Trainee

Nov 2025 – May 2026

Digital Egypt Pioneers Initiative (DEPI)

Cairo, Egypt – Hybrid

- Learned and applied core concepts in Data Science, Machine Learning, and Artificial Intelligence.
- Worked on real-world datasets to build predictive and analytical models.
- Performed data preprocessing, data cleaning, visualization, and feature engineering.
- Built and evaluated machine learning models using Python libraries such as NumPy, Pandas, and Scikit-learn.
- Gained hands-on experience with SQL for data analysis and model support.

Projects

Prime Care – Medical Management System

UI/UX Designer & Frontend Developer

Built a web-based medical management system for handling patient records and prescriptions. Enhanced frontend interfaces using Angular and contributed to backend APIs with ASP.NET Core. Integrated SQL Server for secure data storage, applied Redis caching to improve system performance, and implemented a Groq-powered chatbot to enhance user interaction and support.

Smart Comfort – Assistive Smart Wheelchair App

UI/UX Designer & Concept Owner

Designed a mobile application to assist individuals with special needs by enabling wheelchair tracking, battery monitoring, impact detection, and real-time location services. Created a fully accessible UI using Figma, focusing on usability, clarity, and inclusive design principles.

Tagom – CRM System

Full Stack Developer

Implemented a full-featured CRM system using Angular 17 and TypeScript with secure authentication through ASP.NET Core and JWT. Built customer management modules, role-based dashboards, responsive UI with SCSS, and integrated frontend services with backend APIs.

Covering System – Waste Collection Management

Backend & System Developer

Built a web-based waste collection management system using PHP. Enabled citizens to submit pickup requests with specified locations and time slots. Implemented scheduling mechanisms to organize operations efficiently and created an admin dashboard to manage users, monitor requests, and track system workflows.

Applied backend development concepts including CRUD operations, database integration, and system workflows using PHP.

3zbawyh – Point of Sale (POS) System

PHP Developer

Implemented a full-featured POS system using pure PHP and MySQL. The system supports product and customer management, invoicing, tax and discount calculations, and payment processing. Applied session-based authentication, role-based access control, and secure coding practices. Documented the project with a demonstration video.

Education

Bachelor of Information Technology

Expected September 2027

New Cairo Technological University

Relevant Coursework: Web Development, Databases, Software Engineering

Skills

Frontend Development	React.js, Angular, HTML5, CSS3, JavaScript (ES6+), Responsive Design
Backend Development	PHP, .NET, ASP.NET Core, RESTful APIs, SQL Server, MySQL
UI/UX Design	Figma, Wireframing, Prototyping, User-Centered Design
Tools	Git, GitHub
Concepts	OOP, MVC Architecture, Authentication, Authorization
Soft Skills	Communication, Teamwork, Adaptability, Problem-Solving

Certifications

- Digital Egypt Pioneers Initiative (DEPI) – Data Science & Artificial Intelligence Track
- CIS UI/UX Design Course
