OBJECTIVE

Motivated third-year Information Technology student at New Cairo Technological University with hands-on experience in front-end development using React and Angular, and a strong foundation in UI/UX design. Currently learning .NET and ASP.NET Core with the goal of becoming a Full Stack Developer. Passionate about building scalable, secure, and user-friendly web applications.

SKILLS

Frontend Development	React.js, Angular, HTML, CSS, JavaScript
Backend Development	.NET, ASP.NET Core, SQL Server
UI/UX Design	Figma
Version Control	Git, GitHub
Soft Skills	Teamwork, Communication, Adaptability, Problem-Solving

PROJECTS

Prime Care – Medical Management System

UI/UX Designer & Frontend Developer

Developed a web-based medical system for managing patient records, prescriptions, and healthcare services. Built the frontend using Angular, contributed to backend development with ASP.NET Core, integrated SQL Server for secure data handling, used Redis for performance optimization, and implemented a Groq-powered chatbot to assist users.

Smart Comfort – Assistive Smart Wheelchair App

UI/UX Designer & Concept Owner

Designed a mobile application to assist individuals with special needs by enabling smart wheelchair tracking, battery monitoring, impact detection, and real-time location tracking. Designed the full user interface using Figma with a strong focus on accessibility and simplicity.

Tagom – CRM System

Full Stack (Front - Back)

Built a full-featured CRM system using Angular 17 and TypeScript with secure authentication via ASP.NET Core and JWT. Developed customer management features, role-based dashboards, responsive UI with SCSS, and integrated frontend services with backend APIs.

EXPERIENCE

Frontend Developer Intern

Prospera Systems

July 2024 – August 2024

Egypt

- Collaborated with senior developers and designers on real-world web projects.
- Built and styled responsive user interfaces using HTML, CSS, and JavaScript.
- Assisted in testing, debugging, and optimizing front-end components.
- Gained exposure to industry best practices and collaborative workflows.

UI/UX Instructor

Google Developer Groups (GDG) – University Chapter

6 Months

- Delivered hands-on UI/UX sessions covering design fundamentals, user research, and wireframing.
- Mentored students on practical UI/UX projects using Figma.
- Guided participants through real-world design thinking workflows.

- Improved students' understanding of usability, accessibility, and user-centered design.

KidZania Instructor

June 2025 – September 2025

KidZania Egypt

- Delivered interactive educational experiences in a fast-paced environment.
- Developed strong communication and public speaking skills.
- Demonstrated teamwork, adaptability, time management, and decision-making skills.

EDUCATION

Bachelor of Information Technology

Expected September 2027

New Cairo Technological University

Relevant Coursework: Web Development, Databases, Software Engineering

CERTIFICATIONS & TRAINING

- Digital Egypt Pioneers Initiative (DEPI) – Data Science & Artificial Intelligence Track
Covered Python fundamentals, data analysis, machine learning basics, and core AI concepts.
- CIS UI/UX Design Course
